RE: End-Cap Booths

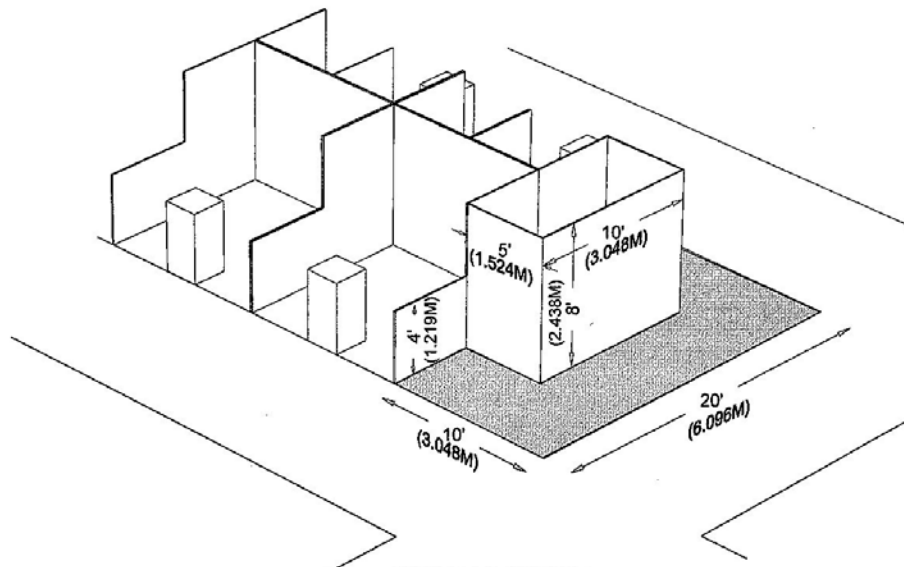

---

Exhibitor:

The below message pertains only if you have been assigned an end-cap booth.

Due to issues AAMP has had in the past with end-cap booths, I wanted to make sure that you clearly understood the rules, regulations, and restrictions of an end-cap booth.

End-cap booths are generally 10ft. deep by 20ft. wide. The maximum back wall height of 8ft. is allowed only in the rear half of the booth space and within 5ft. of the two side aisles, with a 4ft. height restriction imposed on all materials in the remaining space forward to the aisle.

Please feel free to contact me should you have any questions. Thank you!
